EXAMINER'S AMENDMENT

Applicant's election without traverse of claims 1-31 in the reply filed on 08/25/04 is acknowledged

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claims 32-35 have been cancelled in order to put the case in condition for allowance, the claims relating to a non-elected invention.

Allowable Subject Matter

Claims 1-31 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach to one of ordinary skill in the art, in combination with the other limitations of the independent claims, a temperature sensor assembly adapted to sense a temperature of the water within the tank and coupled to the exterior surface of the tank or a radiant sensor, the temperature sensor assembly comprising a non-planar base at least partially defining a volume, a sensor disposed within the volume, a collector coupled to the base and coupled to the water tank, and a reflector coupled to the base. It is noted that the predominant teaching in the prior art is a simple thermally conductive block through which heat is transmitted to a temperature sensor. The prior art fails to teach a collector and a reflector in any real sense.
